

HASSLE-FREE AUTO EVAPORATION
TCL casement air conditioner automatically starts water evaporation when it's turned on, and drying function when it's off. Residual moisture will be dried out to prevent your product from building mold and odor.

HIGH EFFICIENCY COMPRESSOR WITH INVERTER BRINGS YOU COST-SAVING COOLING
The smart LG compressor adopts the advanced frequency conversion technology that not only gives you higher cooling capacity but is more cost-saving by using less electricity.

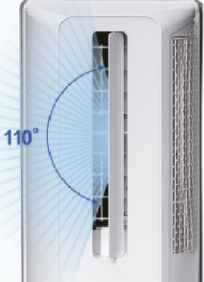

MAGNETIC REMOTE CONTROL
When the air conditioner is not in use, just stick remote control on the side panel. No fuss. No worry of losing it.

24 HOURS TIMER
Set your own start or end time to enjoy cooling anytime you need it.

'WIDE-AREA COOLING' FOR EVERY CORNER OF THE ROOM
The maximum opening angle of louver minimizes most blind spots. You can fill your room with cool air by choosing any one option of the 3-speed fan mode.

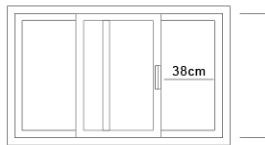

GENTLE COOL WIND
Ever bothered by the 'direct cold wind blow' from your air conditioner before? TCL technology specialises on bringing you gentle cool wind that feels just right and comfortable on the skin.

ULTRA QUIET SLEEP MODE
The super low frequency operation mode brings noise down to a level almost about 20% quieter than normal window air conditioner.

TCL Casement Air Conditioner is suitable for most windows including sliding & push out types.

Width of your window panel should be at least 38cm wide.

Height of your window panel should be at least 92cm tall.

Ask a TCL authorised dealer or retailer for details and installation cost.
